Hello, I'm going to show how you can create a new tile and take a photo yourself with your camera. First we go to edit mode. Click on the profile picture at the top right.

Then start editing, and at the bottom we can add a new tile. For now let's choose a word. Let's say a glass of water.

Because I have that one here on my right. And then I want to say: okay, I'd like to take a new photo. Then we go over here and we can say: yes, take a photo.

We can crop it a bit, and then we click on crop. And then we see that we've added a glass of water. We can confirm the position.

Exit edit mode. When I click on it, it's spoken right away, and that's how we can easily add our own content.
