

Image from the internet

Step-by-step instructions for Image from the internet in Express Me.

Watch the video, follow the steps, or open the complete transcript for a text version of the instructions.

Step-by-step instructions

1

Open tile creation

Enter edit mode and click **Add tile**.

2

Enter tile name

Select **Word**, type the name for your new tile (e.g., "firefighter"), and click **Create tile**.

3

Select web image source

Choose **From the internet** from the four available options. Express Me will automatically search for images matching your tile name.

4

Choose and confirm image

Browse the search results and select the desired image, then click **Confirm position**.

5

Save changes

Exit edit mode to finalize your new tile.

Hello everyone, I'm Rick from ExpressMe.

And today I'm going to show you how we can easily choose an image from the internet when creating a new tile.

We're going to create a new tile called firefighter. And as you can see, I'm already in edit mode. So we can simply click on add tile.

Then we go for the word and we can start typing. And then we say create tile and then we see that there are four options.

And now we're going to choose from the internet. And then you can see that the right images are immediately searched for the word.

And then we can click back and forth a bit if we don't see the ideal picture right away. I think this one is perfect.

Then we say confirm position. Then we can exit edit mode. And we see at the bottom that a new tile firefighter has been added.
