I'm going to show you how to duplicate a tile in the app.

To do this, first make sure you have edit mode enabled in the settings. Then return to the home screen and press the three dots of the tile you want to duplicate.

Scroll down a bit and select the "Duplicate" option. Before confirming the duplication, you can first select the category where you want to duplicate the tile to.

Once you've chosen the desired category, press the duplicate button. The tile will now be copied to the new location, including all underlying tiles that were beneath it.

This way you can easily duplicate tiles between different categories!
