Step-by-step instructions

1

Open the edit mode

Tap the profile icon in the top right and choose **Start editing**.

2

Open the tile

Tap the three dots on the tile whose position you want to adjust.

3

Choose edit position

Scroll to **Edit position in the category**; the tile starts flashing.

4

Move the tile

Use the arrows to move the tile.

5

Confirm

Tap **Confirm position** and leave the edit mode.

Hello, I'm going to show how you can adjust the position of the tiles. Let's say in this case we'd like to swap taxi with train.

Then we first need to go to edit mode. We click on the blue profile picture at the top right. Then we click on start editing.

And then we can click on the three dots in the taxi tile. And if we then scroll down a little, we can say: adjust position in the category. You'll see it starts flashing orange.

And then we can simply navigate back and forth here with the arrows. We can go up and down. In this case we're going to swap this one, so we go to the right.

Then we can confirm the position. Then you'll see everything needs to update for a moment. We exit edit mode, and you'll see everything has been updated.
