I'm going to show you how to delete a tile from the app.

To do this, first go to settings and make sure edit mode is enabled. This is important because otherwise you cannot edit or delete tiles.

Then return to the home screen and press the three dots of the tile you want to delete. Scroll down in the menu that appears and you'll see a red "Delete" button.

When you press this, you'll see a confirmation screen asking if you're sure you want to delete the tile. Confirm your choice by pressing "Delete" again.

The tile will now be permanently deleted from the app.
