I'm going to show you how to enable dark mode in the app.

If you prefer working with a dark interface, go to settings. Scroll down until you find the 'Appearance' option. By default this is set to 'light', but you can easily switch it to 'dark'.

Once you make this selection, you'll immediately see the entire app switch to dark theme. This isn't just visually appealing, but can also be easier on your eyes in low-light environments.

Try it out yourself and enjoy the new look! Bye!
