Hi, I'm going to show how you can change the language within the app. You can now go to the settings.

At the top right you have the blue icon you can click on. Then you'll see app settings. If we go there, we can scroll down a bit.

Then we see all the languages currently supported in our app. If I click on English, I see that all the text here is changed right away.

If I go back, you see that the content is also changed right away to the correct language. If I click on it, it's then pronounced in the correct language.
